

Steps to execute the Tuto

- **Steps:**
- 1- Install MTF.
- 2- Install TE-XTR.
- 3- Open “How to create and configure a virtual adapter ” and follow steps.
- 4- Run the command lines below:

```
xtr --output_path PUT YOUR LOGPATH HERE core -c  
Your folder location\mtf_tutorials\mtf_basic_tuto\config\TestBenchConfigs\MTF_test_tb\All_bus_types_config_file.yaml run --  
test_series  
Your folder location \mtf_tutorials\mtf_basic_tuto\config\TestSeries\All_mtf_basic_tuto.xml --search_paths  
Your folder location \mtf_tutorials\mtf_basic_tuto\tests
```
