

TE-Driver Installer

- **What Technica devices can I use with the TE-Driver?** The TE-Driver currently supports BTS boards, BTS-Evo boards, CM CAN Combo, CM LIN Combo and the BTS-Revo board.
- **What versions are there of the TE-Driver?** The TE-Driver is available on Windows (32 and 64 bits) and for Linux platforms. Currently only the Windows have a C-API. For the Linux versions, only the C++ API is available.
- **How do I install the TE-Driver on my machine?**
 1. Run the installer with admin rights.
 2. Select the path where you want to install the TE-Driver on the installer's prompt.
 3. Run installation.
 4. Enjoy your TE-Driver.
- **Who should I contact in case of trouble?** Please direct all problems/requests to mtf.support@technica-engineering.de
